FOOD DONATION APP

BY TEAM : PHOENIX

INTRODUCTION

- Food Waste in Hotels and Restaurants, Family Functions, Fruits and vegetables from APMCs and sometimes maybe Preserved Food from grocery stores is wasting which is a serious issue that contributes to Economical and social problems, Which leads to a higher rate of food waste and causes Environmental pollution. While the food is wasted on the one hand on the other side hand is Begging And suffering from hunger, Food Donation App is developed to solve this kind of problem for society's welfare.
- About 1.3 billion tonnes of food will be wasted Every year which means 1,000 tonnes of food will be wasted every minute. Unsurprisingly Worlds most populated countries waste the highest food in the world China ranks first and India stands in the second position.
- **The direct financial significance of food wastage runs to the tune of \$750 billion annually**

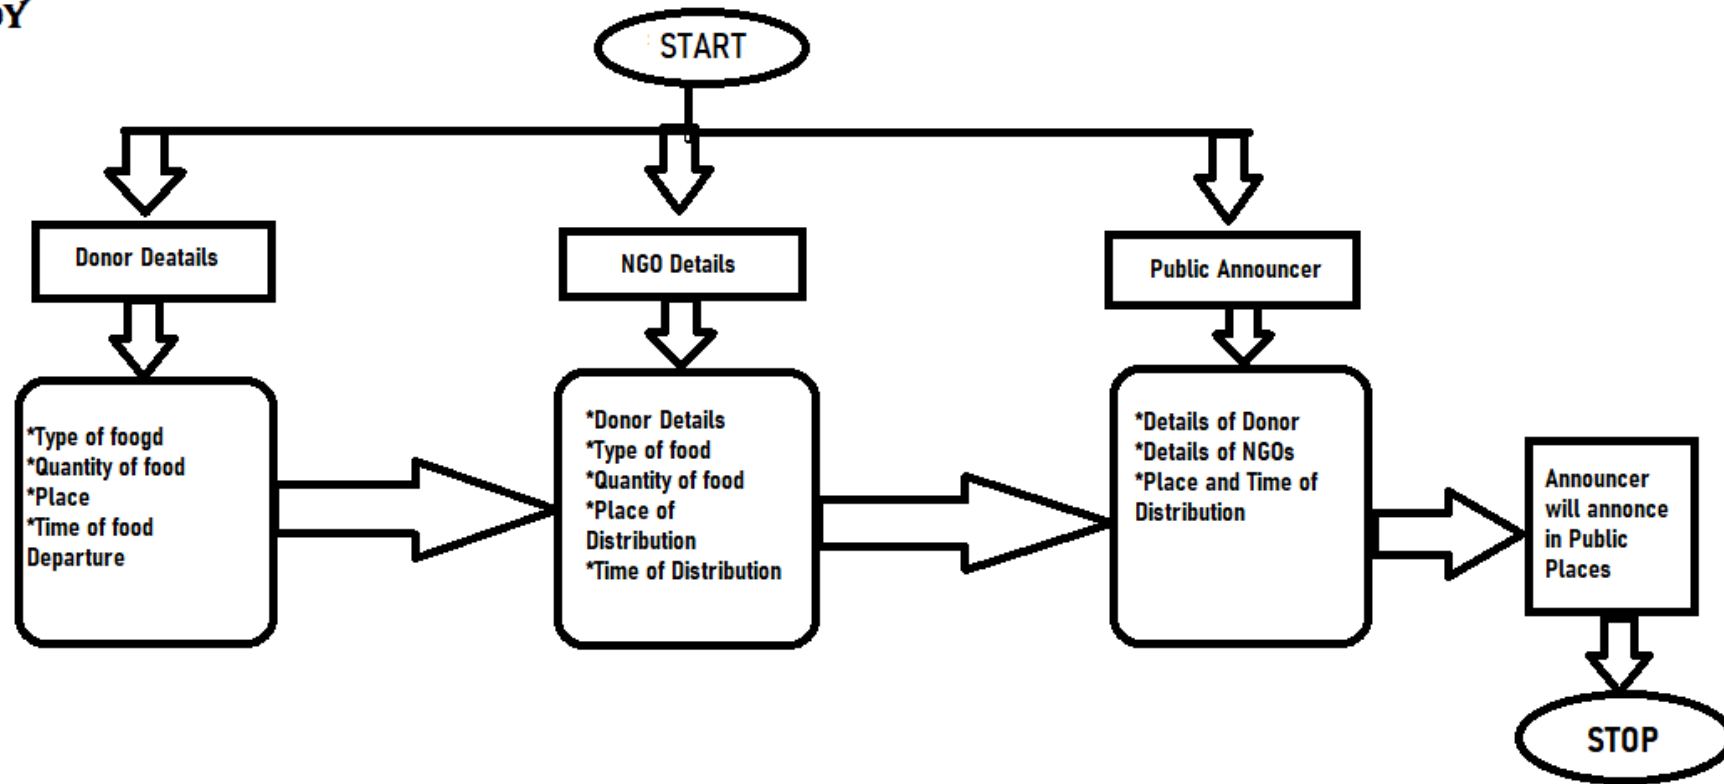

METHODOLOGY

- ☐ **In Application, it has three Fragments, Donor, NGO, and Public announcer. Donors are people who are charting the food, they may be hotels and restaurants or People from Fruits and vegetable stores whoever is willing to Donate will act as Donors.**
- ☐ **They will Fill in the details through the Portal which contains the Donor's name and contact and quantity of food and hotel address.**
- ☐ **These Records will be Sent to The NGOs and further Public Announcers. The Record Contains The Quantity of Food and the Place that is going to be Distributed So the Public announcer will announce the details In Public places like Bus stops or maybe in Railway stations where most of the Peoples Gather.**
- ☐ **The food will be Distributed To the people By the NGOs. People who are in need can come to the place specified and get food for free.**

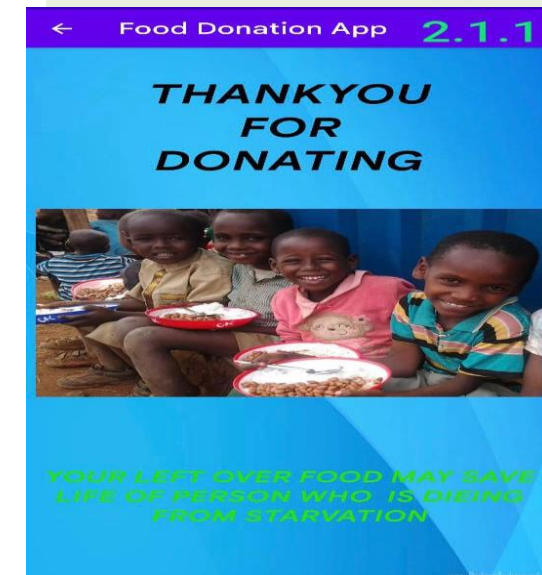

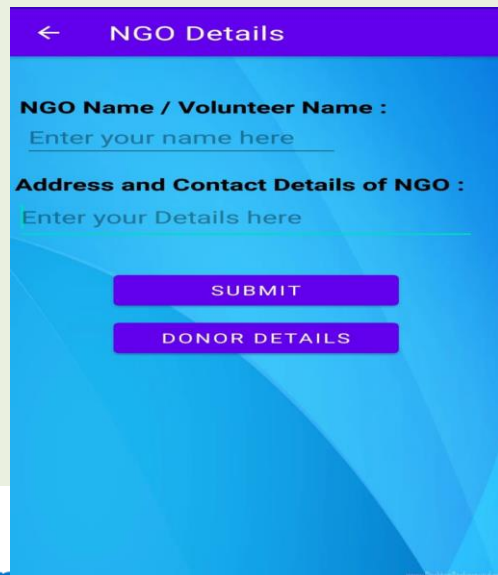

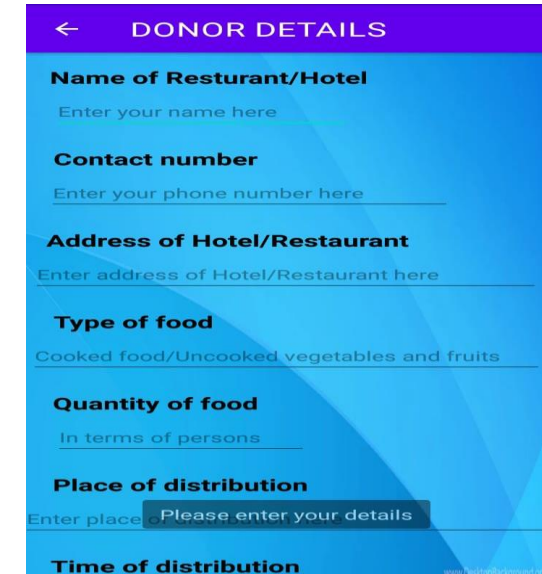

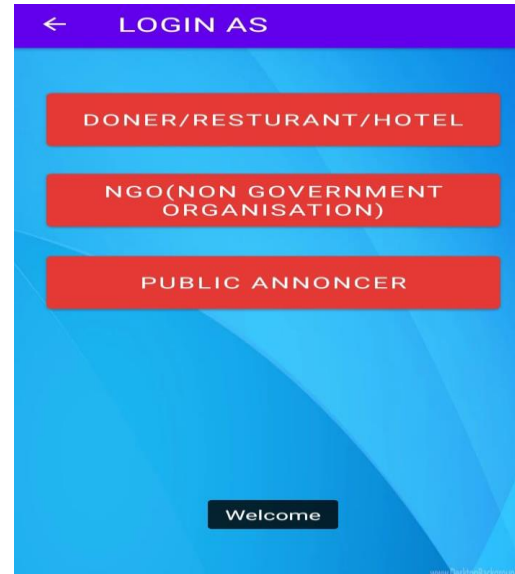

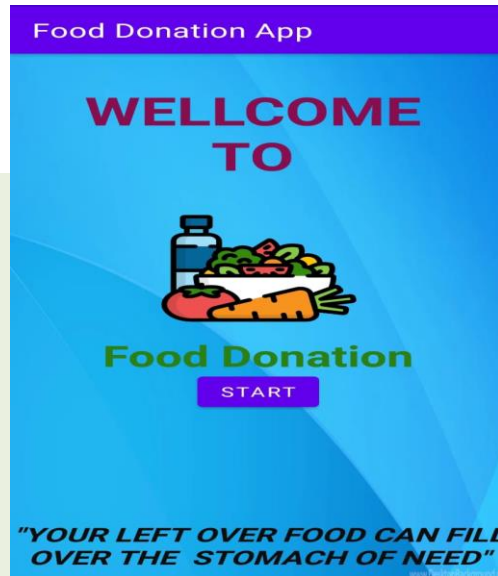

PROTOTYPE OF APP

FEED THE NEEDY

INTERFACE OF THE APP

CONCLUSION

There are so many people out there who are starving, According to WHO 820 million people did not have enough food to eat in 2018, 811 million in 2019, and hunger is still growing.

There is so much food-wasting With or Without Knowing, Let's take a step forward to Eradicate Hunger, Saving Our Mother Earth from Pollution.

A circular inset image showing a city skyline at sunset or sunrise, with the sun low behind the buildings, creating a golden glow. The skyline includes various skyscrapers and a street with cars in the foreground.

THANK YOU!
